Project topic: Campus Requirement System

Campus Requirement System

Online Placement Portal is used to automate and simplify the process of registration, company view, details of applied students and check the eligible criteria of student for the placement of particular company and also view the list of selected student details. And the placement officer easily sends mail of selected student names to their respective department. The students can view the alumni placement details. This portal is efficient one to use and security based also. Our portal allows the authentic person to access data.

The" Campus Requirement System" has been developed to override the problems prevailing in the practicing manual system. This software is supported to eliminate and, in some cases, reduce the hardships faced by existing. Moreover, this system is designed for the particular need of the company to carry out operations in a smooth and effective manner.

The aim is to automate its existing manual system by the help of computerized equipment's and full-fledged computer software, fulfilling their requirement, so that their valuable data/information can be stored for a longer period with easy accessing and manipulation of the same. Basically, the project describes how to manage for good performance and better services for the clients.
